

Follow these simple steps to green your workplace and reduce your carbon footprint

- Educate staff on recycling best practice
- Encourage and improve staff understanding on energy efficiency
- Establish a Green Team to co-ordinate campaigns to encourage uptake of low carbon behaviours in the office
- Try going for a paperless office – 25 people printing 40 fewer sheets of paper each week saves 52,000 sheets of paper per year, enough paper to reach to the top of Ben Nevis more than 11 times
- Create a sustainable travel group to encourage less car use
- If you have pool cars, why not move to a fleet of electric vehicles?

Action #26

Green your workplace
