

EDINBURGH SOLAR PV AND BATTERY STORAGE PROJECT DETAILS

This project will involve the installation of solar panels and battery system. The Solar panels will be installed on the roof of your house while the battery will be placed in a suitable location inside the property, typically the loft space.

Please see the details below of what this project includes.

What's included?

- 2KWp solar panel system consisting of approx. 6 solar panels depending on specific roof dimensions
- 2kW solar PV inverter
- Minimum 4kWh battery storage and associated AC charger unit
- Generation Meter
- Provision of warranties.
 - 12 years product warranty on solar panels and mounting system
 - 5 years product warranty on solar inverter and AC charger
 - 7 years product warranty on batteries
 - 1 year installation workmanship warranty
- Training in system operation and handover pack
- A pre and post install EPC (Energy Performance Certificate) assessment.
- Lifting and refixing carpets and floor finishes where necessary for the work
- Insulation works where required such as:
 - Cavity wall, loft, and underfloor insulation where required
 - Draught proofing of doors and/or windows where required

What's not included?

- Decorating, beyond any basic 'making good' tasks.
- Ongoing management of the batteries

Contractor information

Locogen has been selected to carry out surveys and installations and will be in your neighbourhood in the coming weeks arranging surveys with householders. Here is their logo for your reference:
