

Step-by-step:

How do the Energy Efficient Scotland: Area Based Schemes work?

1. Changeworks identify householders that may be eligible to receive funding from the Scottish Government promoting it via direct mail, social media, and local publications.
2. Householders and private landlords register their interest by completing an online form.
3. Changeworks assess householder information and refer to the appointed contractor.
4. Contractor will carry out a technical survey of the property.
5. After the survey, if the property is suitable and householder is happy to be part of the project, the contract is issued and signed.
6. Householder completes pre installation monitoring and evaluation survey as part of the conditions to receive grant funding from the Scottish Government.
7. Contractor agrees with householder a date to commence work.
8. Installation takes place and Changeworks carry out quality assurance inspections.
9. Householder completes post installation monitoring and evaluation survey.
10. Home Energy Scotland will contact householders to issue advice on how to make the most of your new energy efficiency measure.
