

Wrap gifts sustainably

December is a great time to think about ways you can [wrap presents more sustainably](#) and reduce the 108 million rolls of wrapping paper used in the UK each year!

- **Try Gift bags** – they're reusable and well suited for the lazy elf who can't find the end of the tape! (Fabric gift bags can conceal your gifts better than normal gift bags).
- **DIY fabric** – old Christmas tablecloths, leftover fabric etc. can be a great way of saving money on wrapping and are also reusable. Simply secure with ribbon, cut-up fabric, or eco twine.
- **Re-use your paper** – think ahead for next year by not tearing through all your presents this Christmas and save it to be reused next year.
- **Use Re-cyclable wrapping paper** – check the wrapping paper you get can be recycled, some have plastic coatings preventing it from being recycled.
