

“

It's a great facility and the course is fun and very informative. ”

Richard Whitney, Director
Onsite Generation Ltd
Ullapool

“

Being able to complete the course with the convenience of our own premises was extremely convenient and saved us a fortune in travel expenses and downtime. ”

Ryan Pollard, Managing Director
RDI Renewables Ltd
Thurso

“

The hands-on teaching style really works for this type of material, and the mobile training rig was absolutely fantastic. ”

Louden Bruce, Engineer
Nordri Ltd
Lerwick

“

Course was well run and very easy to understand. Was given help when needed and enjoyed it. ”

Mark Watt, Owner
ML Watt Builders
Lerwick

Funded heat pump training delivered to your doorstep

Funded heat pump training, where you need it

If you're an installer in a rural or remote area, getting training can be difficult. The mobile heat pump training centre brings expert courses to your doorstep, so you don't have to travel far. Funded by the Scottish Government and delivered with the Green Heat Installer Engagement programme at Energy Saving Trust and South Lanarkshire College, this service helps you gain the skills and qualification you need to install heat pumps and grow your business.

Funding support

Through the Scottish Government's Heat Pump Skills Fund, training places are available to eligible candidates for just £250.

- The fee is payable to South Lanarkshire College at the time of booking.
- Funded places are available while funds last.
- Funding cannot be used for training already completed or for retaking the BPEC certification.

What's included?

- Training delivered at a convenient location for up to eight candidates.
- Air source heat pump installation and maintenance training.
- If you pass the training, you'll get a BPEC qualification. This is an MCS-approved qualification that can help you become a certified heat pump installer.
- Optional add-ons (prerequisite for BPEC): Water Byelaws/Regulations and domestic vented/unvented hot water storage certificates.
- Training tailored to your team's existing knowledge and needs.

Who can upskill?

Anyone with SVQ 3 or equivalent qualification in the following courses:

- Plumbing and heating at SCQF level 7.
- Install, commission and maintain refrigeration systems at SCQF 6.
- Install, commission and maintain air conditioning systems at SCQF 6.
- Service, maintain and commission building engineering services at SCQF 7.
- Heating and ventilating: industrial and commercial installation at SCQF 6.

No qualifications?

You can still upskill and take part in the training under what's known as "defined scope."

While you won't gain the full BPEC qualification, you'll develop practical skills to assess heat pumps and produce reports – supporting quality installations and helping customers make informed decisions.

How to book

Would you like the mobile heat pump training centre to come to you?

Visit energysavingtrust.org.uk/heatpumptraining and complete the training request form.

Email greeninstallerscotland@est.org.uk if you have any questions.
